Business Unit GEA Flow Components

Regardless of the application – for our customers product quality and profitability are what matters. This is what GEA Flow Components is known for. Our engineers are specialists in everything that flows.

Around one quarter of the milk processed is handled by GEA equipment

Roughly every second liter of beer is brewed using GEA equipment and solutions

Approx. one in three instant coffee lines has been built by GEA

GEA Group Aktiengesellschaft

GEA is one of the largest suppliers of process technology for the food industry and for a wide range of other industries. As an international technology group, the company focuses on world-leading process solutions and components for sophisticated production processes.

GEA Flow Components

GEA offers well-engineered process components and services to ensure smooth production processes in the treatment of liquid products. We develop and produce a comprehensive product range that includes valve technology for all hygienic classes (Hygienic, UltraClean, Aseptic), hygienic pumps and cleaning technology.

GEA Flow Components products and services are available around the world through the international GEA network.

Business Unit GEA Flow Components

State-of-the-art hygienic design

GEA Flow Components meet the highest hygienic standards where required, such as EHEDG and 3-A standards.

Hygienic valves and components from GEA form the core component of matrix-piped process plants.

When it comes to sterile applications, GEA offers both UltraClean and Aseptic valves and systems. The hermetic sealing of the product area provides a maximum level of process line isolation and thus contributes to process and product safety.

The hygienic pump range from GEA includes centrifugal pumps (single-stage, multi-stage and self-priming), as well as rotary lobe pumps.

GEA cleaning devices – whether index, orbital, rotary or static – achieve optimum cleaning results in multiple industries. GEA product recovery systems help to recover valuable products and reduce both waste disposal costs as well as water and detergent consumption.

Applications

- Beverage
 - Beer, juice, smoothie products ...
- Dairy
 - Milk, yoghurt, cheese ...
- Food
 - Sauces & creams, ketchup, mayonnaise ...
- Pharma/Biotech
 - Pharmaceuticals, biotechnology products, cosmetics & health care ...
- Chemicals
 - Fine chemicals, bulk chemicals, cleaning chemicals ...
- Dairy farming
 - Raw milk processing ...

Hygienic Valve Technology

A complete range of economically designed Hygienic valves for complex tasks as well as basic functions, helping producers to achieve high product quality and efficiency.

Aseptic Valve Technology

UltraClean and Aseptic valves are suitable for production processes which require a higher safety protection against contamination from the environment and thus warrant microbial stability of the product over the whole process.

Hygienic Pump Technology

A great variety of Hygienic pumps with sensibly rated high efficiency motors and carefully designed flow paths, driving economic efficiency and sustainable operation.

Cleaning Technology

Index, orbital, rotating and static cleaners in a complete range, developed with special emphasis on saving valuable resources in the cleaning process.

GEA cleaning technology – the solution for every cleaning process

Our cleaning equipment has been developed for sustainable practice, with special emphasis on saving valuable resources in the cleaning process.

Whether using orbital, rotary or static, our cleaners achieve the best cleaning results in multiple industry sectors.

Incorporating our systems into your production can help you to reduce production downtime, waste disposal costs, and water and detergent consumption.

We offer economical, flexible and service-oriented solutions:

Economical

- Reduction in consumption of energy, water, and cleaning agents
- Time and labor required for cleaning is minimized

Flexible

- Diverse range of orbital, rotating, and static cleaners
- Customized cleaning solutions for many different kinds of applications and tank sizes
- Various different spray patterns
- Different cleaning times possible

Service-oriented

- Tailored Engineering Support
- Digital tools (e.g. 3D models)
- Easy-to-maintain
- Onsite cleaning tests

Examples of applications and industries:

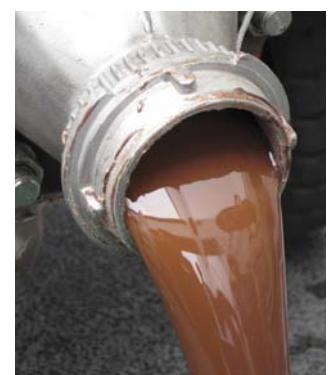

Applications:

- Process vessels
- Storage tanks
- Lauter tuns
- Milk tanks
- Spray dryers
- Fermenters
- Silos
- Mixers
- Batch blenders
- Shipping containers
- Tanker trucks
- IBCs
- Container wash tunnels
- etc.

Industries:

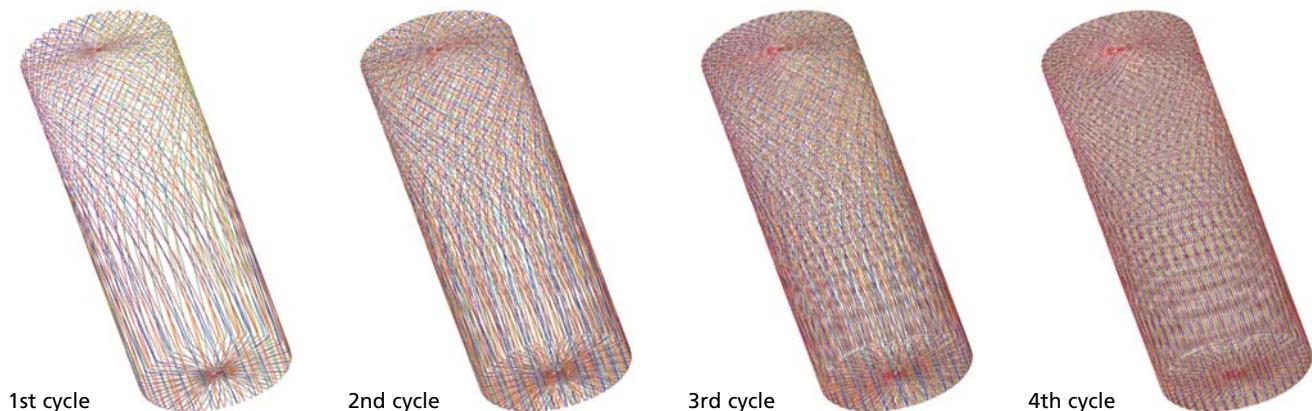

- Brewing and beverage industries
- Dairy and food industries
- Cosmetics industry
- Pharmaceuticals industry
- Fine chemicals industry
- Biotechnology industry
- Chemicals industry
- Paint industry
- etc.

Orbital cleaners

Orbital cleaners work on the basis of two rotating axes, one horizontal and one vertical, as shown in the illustration.

- Hygienic design
- Ball bearing free (exception TMC)
- Slim, compact design
- Intensive cleaning with targeted jets
- Long life
- Easy-to-maintain
- Driven by the cleaning medium (exception TMC)
- Low number of components (orbital cleaners Typhoon, Tempest, Tornado all use the same spare parts)
- Reproducible cleaning by monitoring of the rotation with sensor SMW 100

Rotating jet cleaner

The proven cleaning method of the jet cleaner achieves optimum cleaning results with powerful, slowly rotating fan-spray jets.

- Operates with minimal drive pressure
- Driven using fluid transmission
- Functionally robust
- Easy to maintain
- Integrated cleaning lance
- Various possible spray patterns using different nozzle arrangements on the spray head
- Long life due to wear-resistant components
- For reproducible cleaning, the rotation monitoring option is recommended

Rotating cleaners

The optimum cleaning effect of the rotating cleaners is produced by targeted flat jets or fast moving high impact droplets

- Hygienic design
- Ball bearing free
- Low number of components

**Spray balls**

Spray balls as static cleaners are designed for flush cleaning with a high flow rate, thus providing powerful flushing at low pressure.

- Low capital outlay
- No wearing parts
- Various possible spray patterns, materials, and surfaces
- High flow rates

**Retractors In-Line Sprayer**

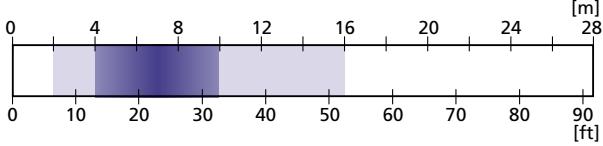

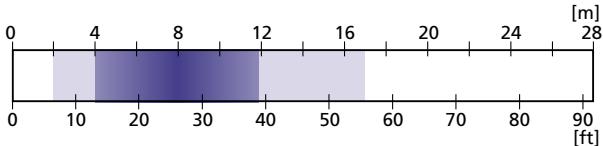

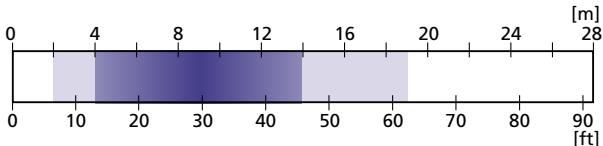

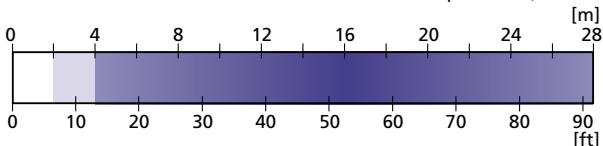

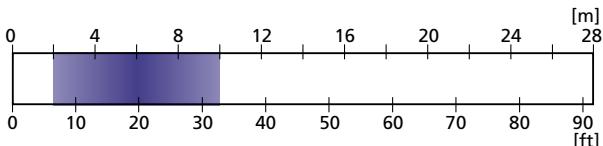

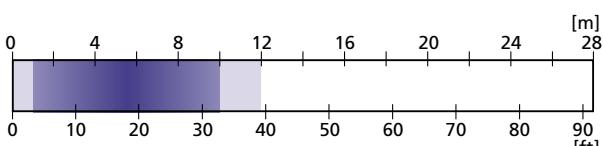

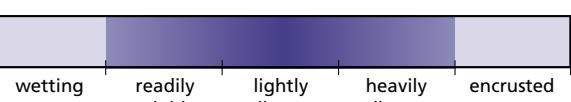

The In-Line Sprayer has an extendable spray head that only extends into the product space during cleaning – which is especially useful for cleaning tanks with moving fixtures (such as agitators, scrapers, etc.) and for large pipes. After cleaning, the spray head retracts into its inoperative position.

- Savings on cleaning agents due to targeted cleaning
- Demonstrable process reliability and functional reliability
- Range of seal materials

In-Line Sprayer

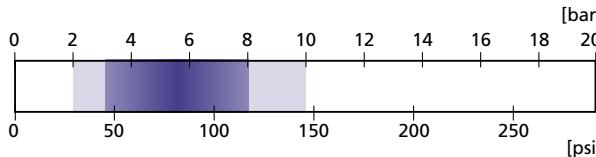

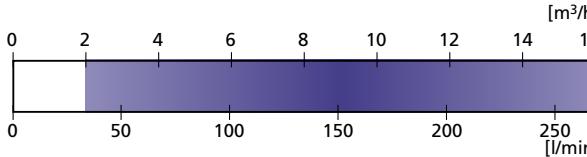

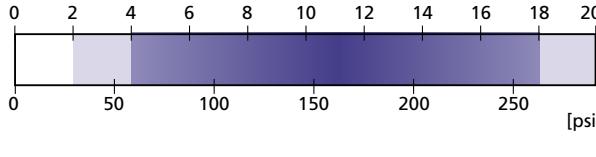

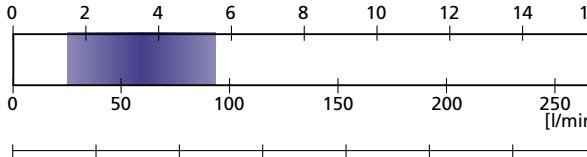

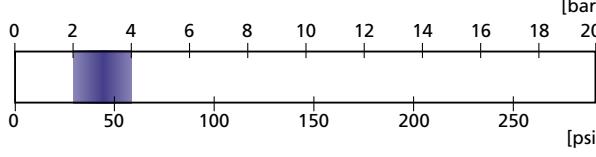

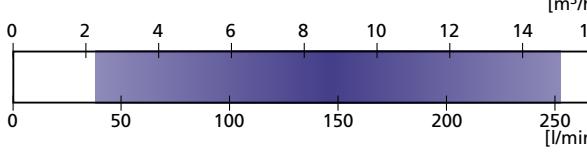

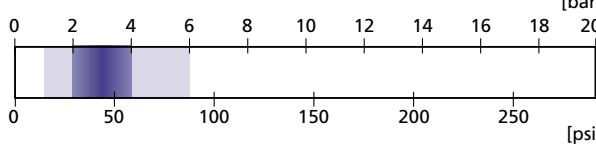

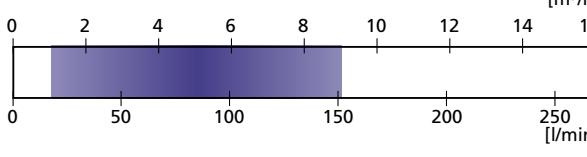

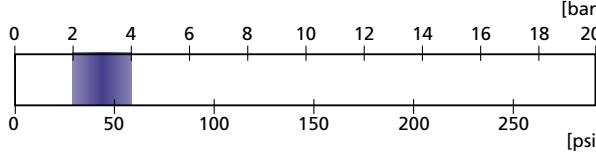

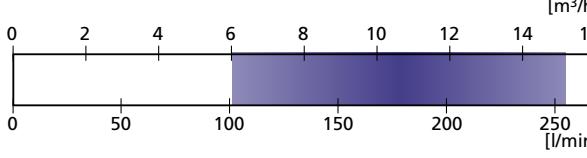

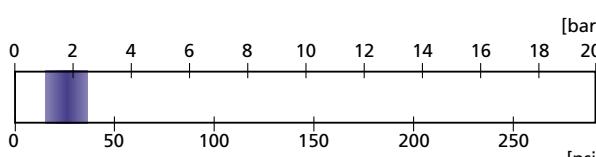

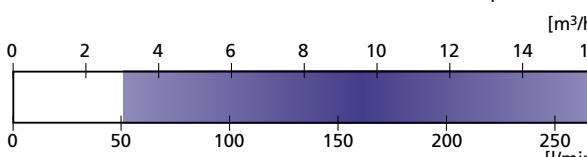

Cleaning components

	Recommended cleaning diameter	Level of soiling
	 <p>Twister</p> <p>Diameter range: 0 to 28 m (0 to 90 ft)</p> <p>Soiling levels: wetting, readily soluble, lightly adherent, heavily adherent, encrusted</p>	 <p>wetting readily soluble lightly adherent heavily adherent encrusted</p>
	 <p>Typhoon</p> <p>Diameter range: 0 to 28 m (0 to 90 ft)</p> <p>Soiling levels: wetting, readily soluble, lightly adherent, heavily adherent, encrusted</p>	 <p>wetting readily soluble lightly adherent heavily adherent encrusted</p>
	 <p>Tempest</p> <p>Diameter range: 0 to 28 m (0 to 90 ft)</p> <p>Soiling levels: wetting, readily soluble, lightly adherent, heavily adherent, encrusted</p>	 <p>wetting readily soluble lightly adherent heavily adherent encrusted</p>
	 <p>Tornado / 4</p> <p>Diameter range: up to 33 m, 108 ft</p> <p>Soiling levels: wetting, readily soluble, lightly adherent, heavily adherent, encrusted</p>	 <p>wetting readily soluble lightly adherent heavily adherent encrusted</p>
	 <p>Jet cleaners</p> <p>Diameter range: 0 to 28 m (0 to 90 ft)</p> <p>Soiling levels: wetting, readily soluble, lightly adherent, heavily adherent, encrusted</p>	 <p>wetting readily soluble lightly adherent heavily adherent encrusted</p>
	 <p>TMC 45/85</p> <p>Diameter range: 0 to 28 m (0 to 90 ft)</p> <p>Soiling levels: wetting, readily soluble, lightly adherent, heavily adherent, encrusted</p>	 <p>wetting readily soluble lightly adherent heavily adherent encrusted</p>

Other applications on request

* = Depending on installation circumstances

** = Anorganic acids such as nitric or sulfid acid

This overview of sealing material is based on manufacturer's information not considering the operating conditions.

The contact time can negatively affect the service life of the seals.

The sealing materials comply with the regulations of FDA 21 CFR 177.2600 or FDA 21 CFR 177.1550.

Diagrams and Cycle Times

All Diagrams and cycle times are based on a cleaning medium of:
 density 1 kg/dm³, viscosity 1 mm²/s, temperature 20 °C, tolerance ±10%

- Powerful compact jetting cleaner
- Low flow rate
- Fits through 100 mm / 4 inch diameter hole
- High spray dwell time
- Similar to Typhoon, Tempest, Tornado for maintenance purposes

Approx. cycle times

Pressure	Nozzles Ø 3 mm	Nozzles Ø 4 mm
4 bar	2 min	3 min 30 s
6 bar	1 min 45 s	2 min 45 s
8 bar	1 min 30 s	2 min 15 s
10 bar	1 min 15 s	2 min

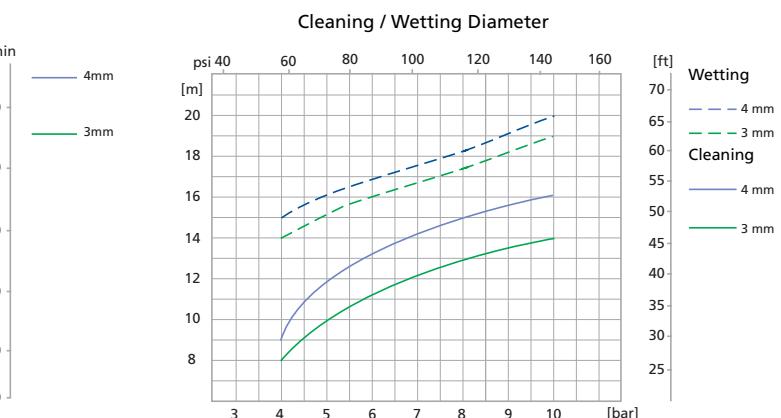

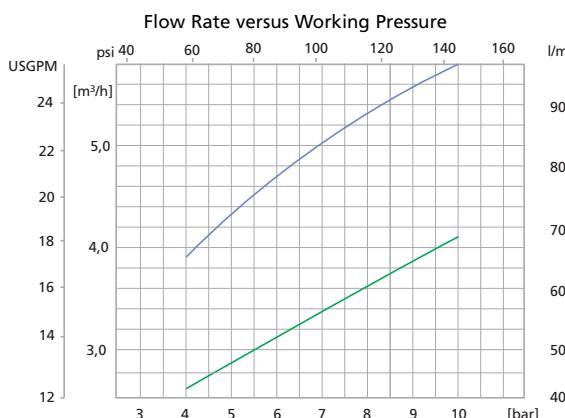

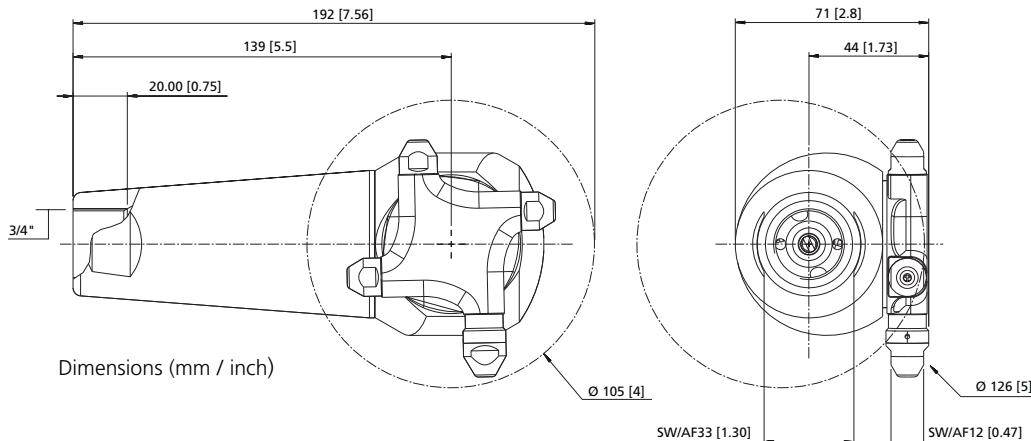

Recommended

working pressure:	4 - 10 bar (58 - 145 psi)
Cleaning diameter:	max. 16 m (52 ft)
Flow rate:	2.7 - 5.8 m³/h (45 - 97 l/min / 11.9 - 25.6 USgpm)
Spray angle:	360°
Operating temperature:	max. 95 °C (203 °F)
Ambient temperature:	max. 140 °C (284 °F), 30 min
Insertion opening:	min. Ø 100 mm (3.94 inch)
Materials:	stainless steel 316L (1.4404), C-PTFE or PTFE, C-PEEK
Weight:	approx. 2.0 kg (4.4 lbs)
Preferred mounting position:	any

¹ optional with Pin Fix connection

Working pressure:	1 - 25 bar (14.5 - 362.6 psi)
Cleaning diameter:	max. 12 m (39.4 ft)
Flow rate:	0.5 - 8.25 m³/h (8.3 - 137.5 l/min / 2.2 - 36.3 USgpm)
Spray angle:	360°
Operating temperature:	max. 90 °C (194 °F)
Ambient temperature/SIP:	max. 130 °C (266 °F), 30 min
Insertion opening:	min. Ø 50 / 96 mm (1.96 / 3.78 inch)
Materials:	stainless steel 316L (1.4404), PTFE
Pipe connection:	3/4" BSP / female thread
Weight:	approx. 11 kg / 15 kg (24.25 / 33.06 lbs)
Preferred mounting position:	any

- Variable volume flows and working pressures
- Different speed with frequent inverter
- Working pressure up to 25 bar (362.6 psi)

TMC 45

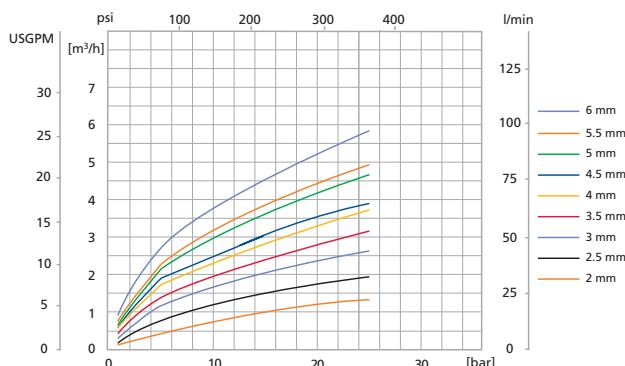

TMC 85

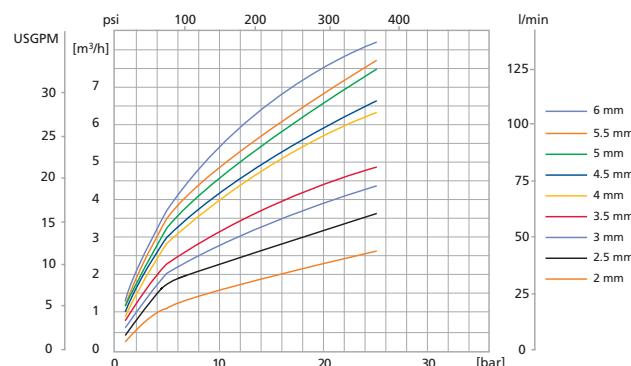

Dimensions (mm / inch)

Flow Rate with Two-Nozzle-Disk

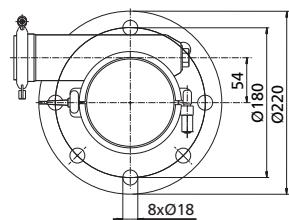

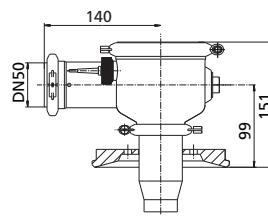

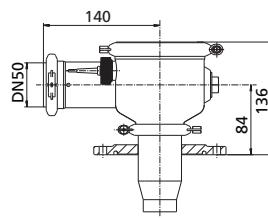

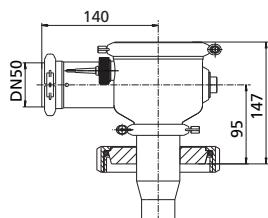

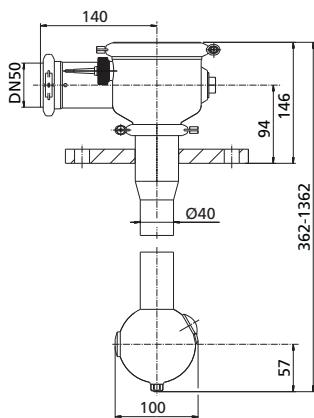

Flow Rate with Four-Nozzle-Disk

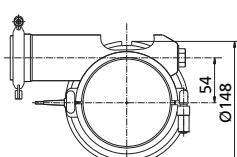

Working pressure:	2.3 - 4.3 bar (33.4 - 62.4 psi)
Cleaning diameter:	max. 10 m (32.8 ft)
Flow rate:	7 - 29 m³/h / 116 - 483 l/min / 30.8 - 127.7 USgpm
Operating temperature:	max. 80 °C, 30 min / optional 90 °C
Ambient temperature/SIP:	max. 130 °C, 30 min with PTFE version only
Insertion opening:	min. Ø 100 mm
Materials:	stainless steel 1.4571 (316Ti) / PP up to 80 °C / EPDM stainless steel 1.4571 (316Ti) / PTFE up to 90 °C / EPDM
Pressure supply port / tank connection:	variable
Weight:	approx. 11 kg (24.25 lbs)
Preferred mounting position:	vertical down

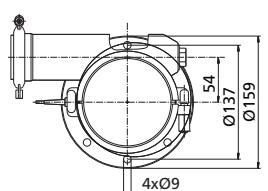

- Robust, low-maintenance
- Variable spray pattern
- Low pressure required
- Slow controlled rotation
- Optional built-in sensor to monitor functioning
- Can be used in the tank safety system

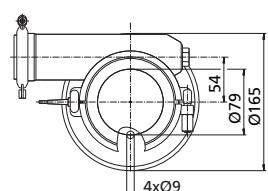

Form G - flange, DN 100 PN 16 to DIN 2501

Form E - screwed union, conical fitting / round slotted nut
DN 100 to DIN 11851

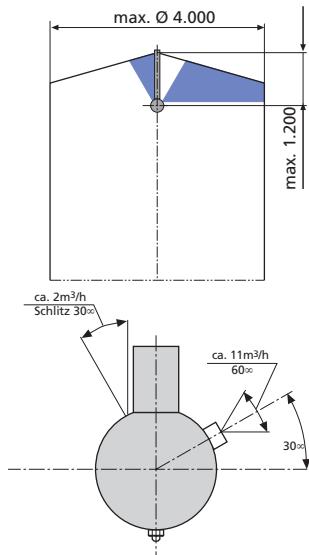

Form D - GEA Tuchenhagen VARIVENT® grooved flange,
DN 100 PN 10 with O-ring design

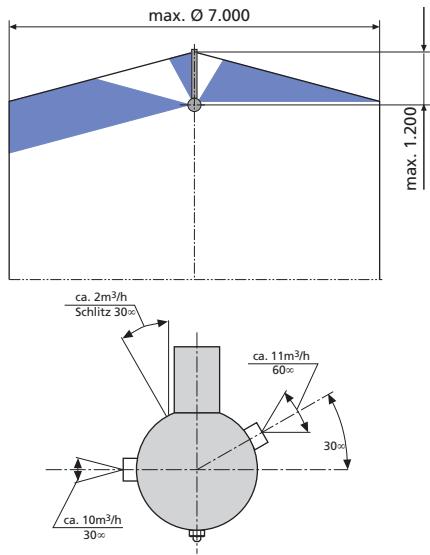

Form A - weld-in flange, split version, fitted from the inside

Dimensions (mm / inch)

Rotating cleaners - Chemidisc 25

C-PTFE

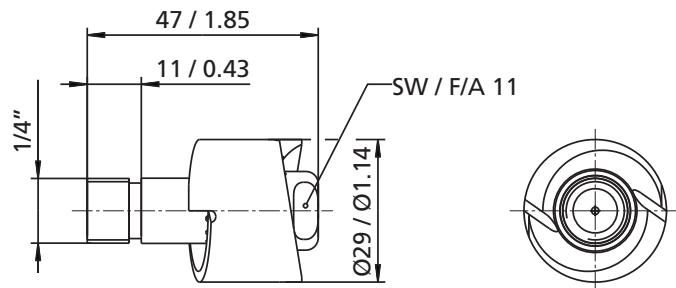

PTFE

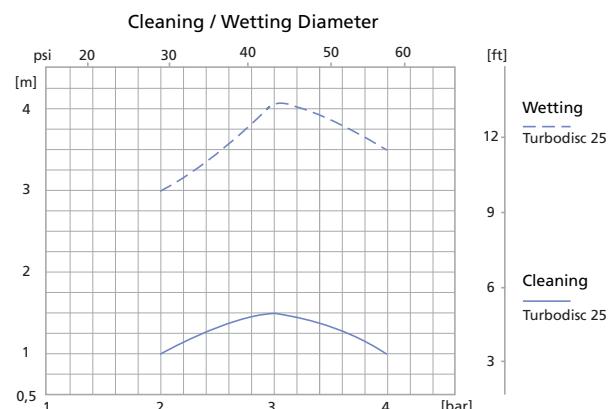

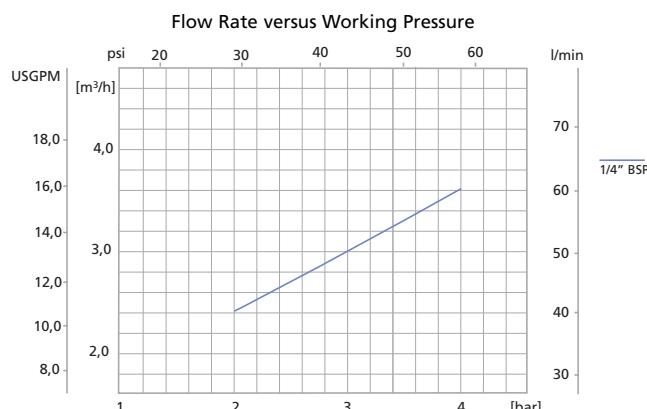

Chemidisc 25	
Working pressure:	2-4 bar (29 - 58 psi)
Cleaning diameter:	max. 1.5 m (4.9 ft)
Flow rate:	2.4 - 3.6 m³/h (40 - 60 l/min / 10.57 - 15.85 USgpm)
Spray angle:	360°
Operating temperature:	max. 95 °C (203 °F)
Ambient temperature/SIP:	max. 140 °C (284 °F), 30 min
Insertion opening:	min. Ø 31 mm (1.22 inch)
Materials:	C-PTFE or PTFE
Preferred mounting position:	any

- Chemical resistant - ideal for corrosive environments
- Lightweight construction - safer in glass lined vessels
- Effective wash - due to high rotation speed

Version	Part number
1/4" BSP male / C-PTFE	4660-1118-133
1/4" BSP male / PTFE	4660-1123-122

Dimensions (mm / inch)

Rotating cleaners - Chemidisc 75

PTFE

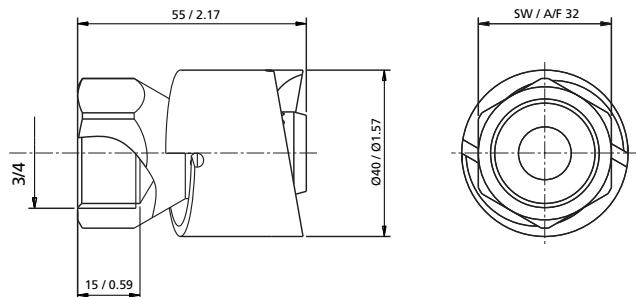

C-PTFE

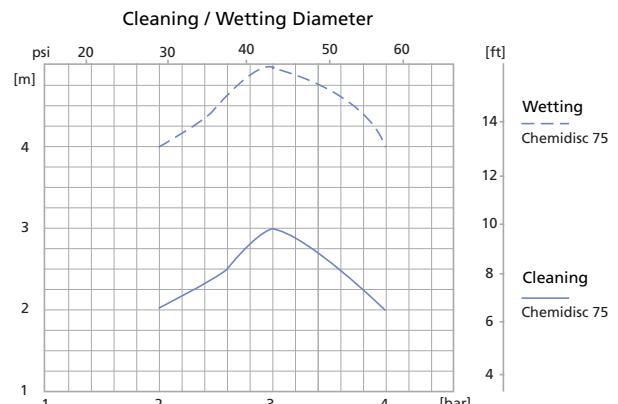

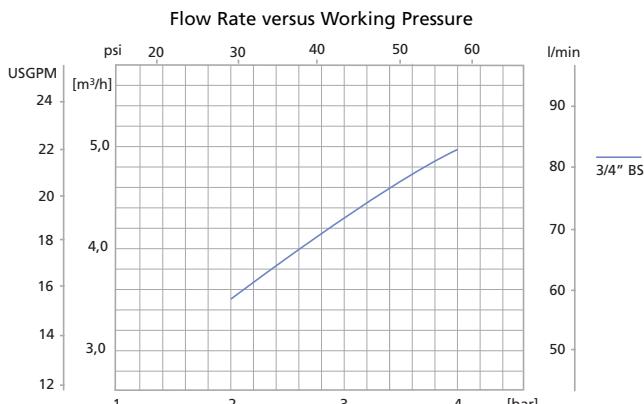

Chemidisc 75	
Working pressure:	2-4 bar (29 - 58 psi)
Cleaning diameter:	3 m (9.8 ft)
Flow rate:	3.5 - 5 m³/h (59 - 83 l/min / 15.6 - 21.9 USgpm)
Spray angle:	360°
Operating temperature:	max. 95 °C (203 °F)
Ambient temperature/SIP:	max. 140 °C (284 °F), 30 min
Insertion opening:	min. Ø 41 mm (1.61 inch)
Materials:	C-PTFE or PTFE
Preferred mounting position:	any

- Chemical resistant - ideal for corrosive environments
- Lightweight construction - safer in glass lined vessels
- Effective wash - due to high rotation speed

Version	Part number
3/4" BSP female / C-PTFE	4660-1131-133
3/4" BSP female / PTFE	4660-1134-122

Dimensions (mm / inch)

Rotating cleaners - Chemidisc 100

PTFE

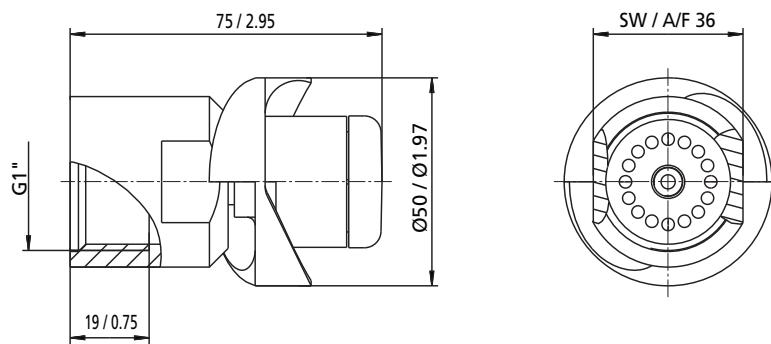

C-PTFE

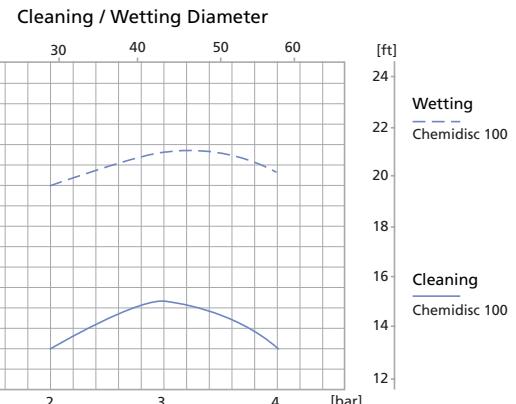

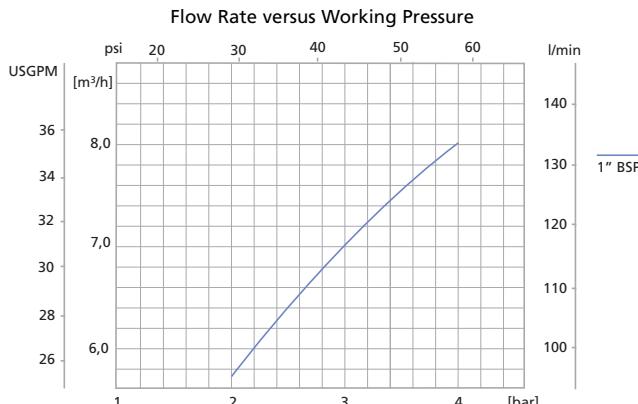

Chemidisc 100	
Working pressure:	2-4 bar (29 - 58 psi)
Cleaning diameter:	4.6 m (15.1 ft)
Flow rate:	5.7 - 8 m³/h (95 - 134 l/min / 25.1 - 35.6 USgpm)
Spray angle:	360°
Operating temperature:	max. 95 °C (203 °F)
Ambient temperature/SIP:	max. 140 °C (284 °F), 30 min
Insertion opening:	min. Ø 55 (2.17 inch)
Materials:	C-PTFE or PTFE
Preferred mounting position:	any

- Chemical resistant - ideal for corrosive environments
- Lightweight construction - safer in glass lined vessels
- Effective wash - due to high rotation speed

Version	Part number
1" BSP female / C-PTFE	4660-1137-103
1" BSP female / PTFE	4660-1103-122

Dimensions (mm / inch)

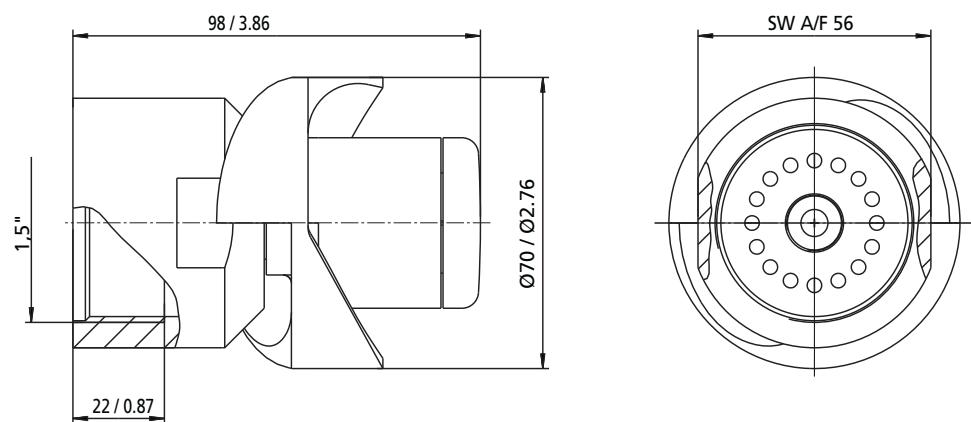

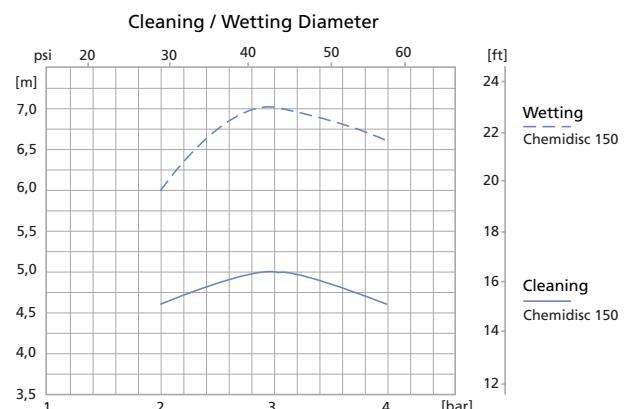

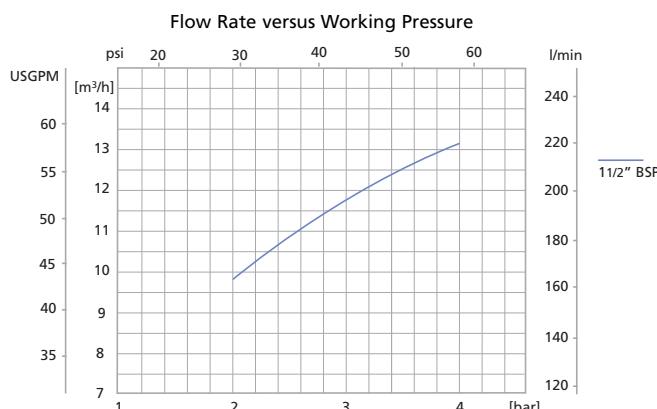

Chemidisc150	
Working pressure:	2-4 bar (29 - 58 psi)
Cleaning diameter:	5 m (16.4 ft)
Flow rate:	9.8 - 13.2 m ³ /h (163 - 220 l/min / 43.1 - 58.1 USgpm)
Spray angle:	360°
Operating temperature:	max. 95 °C (203 °F)
Ambient temperature/SIP:	max. 140 °C (284 °F), 30 min
Insertion opening:	min. Ø 75 mm (2.95 inch)
Materials:	C-PTFE or PTFE
Preferred mounting position:	any

- Chemical resistant - ideal for corrosive environments
- Lightweight construction - safer in glass lined vessels
- Effective wash - due to high rotation speed

Version	Part number
1 1/2" BSP female / C-PTFE	4660-1112-133
1 1/2" BSP female / PTFE	4660-1114-122

Dimensions (mm / inch)

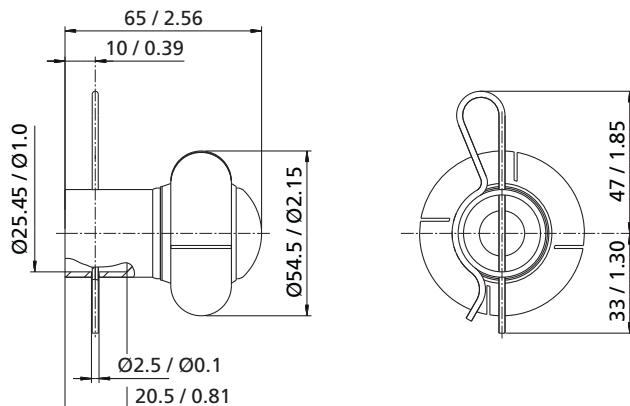

Rotating cleaners - Torus 100

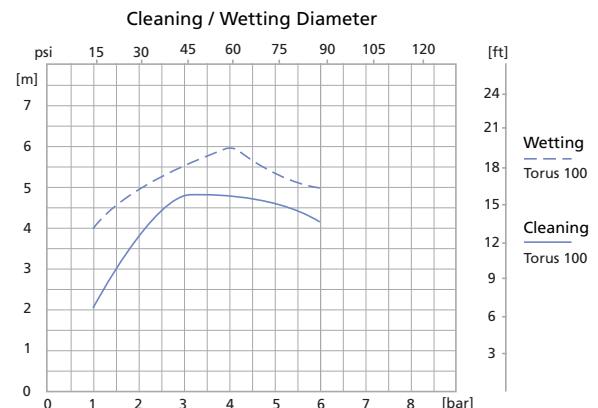

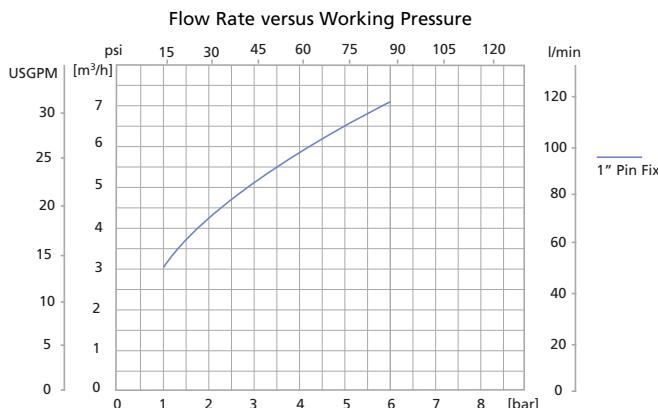

Torus 100	
Working pressure:	1 - 4 bar (14.5 - 58 psi)
Cleaning diameter:	max. 4.8 m (15.7 ft)
Flow rate:	3 - 7.1 m³/h (50 - 118.3 l/min / 13.2 - 31.3 USgpm)
Spray angle:	360° (optional 180°)
Operating temperature:	max. 65 °C (149 °F)
Ambient temperature:	max. 75 °C (167 °F), 30 min
Insertion opening:	min. Ø 85 mm (3.35 inch)
Materials:	stainless steel 316L (1.4404) with PTFE or C-PTFE
Preferred mounting position:	any

- Ultrahygienic
- Low consumption of cleaning medium
- Effective wash - due to high rotation speed
- Low working pressure

Version	Part number
Pin Fix for 1" OD pipe (25.4x1.6) / C-PTFE	4660-1701-413
Pin Fix for 1" OD pipe (25.4x1.6) / PTFE	4660-1704-412

Dimensions (mm / inch)

Rotating cleaners - Chemitorus 50

PTFE

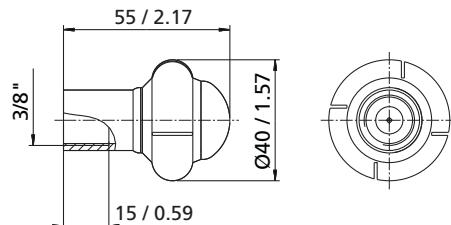

C-PTFE

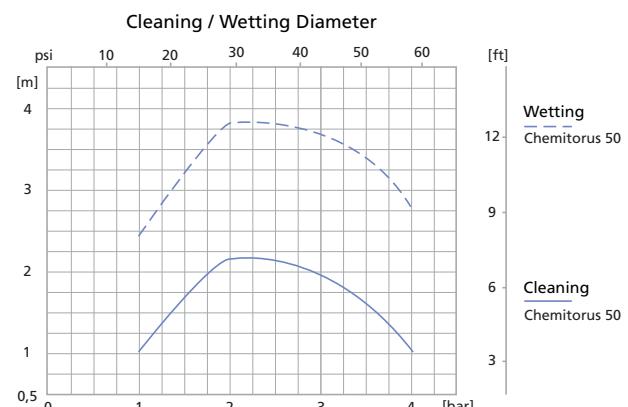

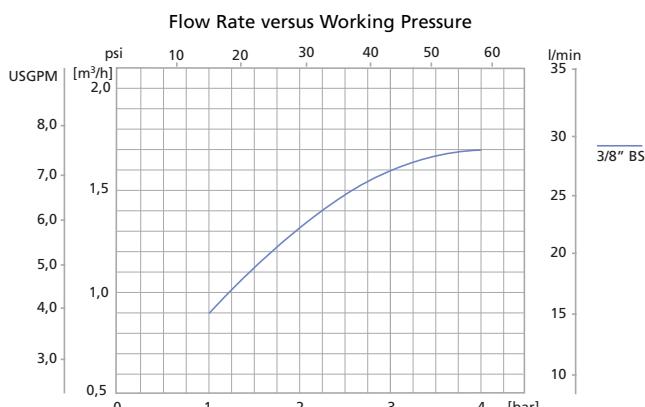

Chemitorus 50	
Working pressure:	1 - 4 bar (14.5 - 58 psi)
Cleaning diameter:	max. 2.2 m (7.2 ft)
Flow rate:	0.9 - 1.7 m³/h (15 - 28.3 l/min / 4 - 7.5 USgpm)
Spray angle:	360° (optional 180°)
Operating temperature:	max. 65 °C (149 °F)
Ambient temperature:	max. 75 °C (167 °F), 30 min
Insertion opening:	min. Ø 42 mm (1.65 inch)
Materials:	PTFE or C-PTFE
Preferred mounting position:	any

- Chemical resistant - ideal for corrosive environments
- Lightweight construction - safer in glass lined vessels
- High rotation speed
- Low working pressure

Version	Part number
3/8" BSP female / C-PTFE	4660-1732-033
3/8" BSP female / PTFE	4660-1735-122

Dimensions (mm / inch)

Rotating cleaners - Chemitorus 75

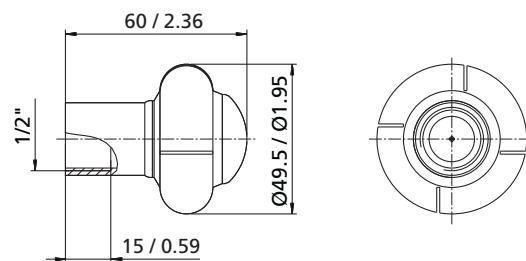

PTFE

C-PTFE

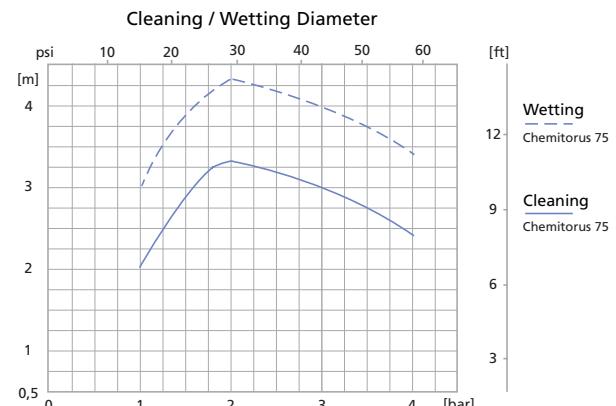

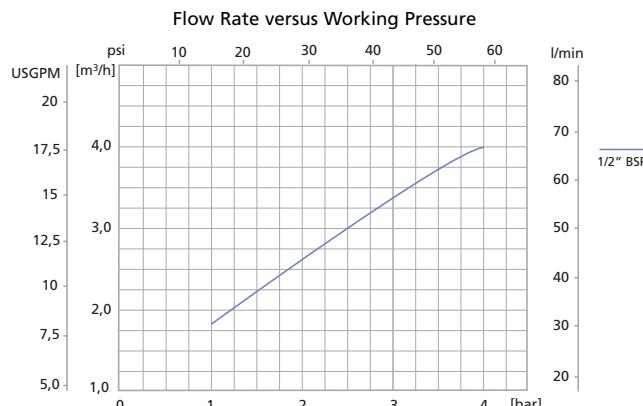

Chemitorus 75	
Working pressure:	1 - 4 bar (14.5 - 58 psi)
Cleaning diameter:	max. 3.3 m (10.8 ft)
Flow rate:	1.8 - 4 m³/h (30 - 66.7 l/min / 7.9 - 17.6 USgpm)
Spray angle:	360° (optional 180°)
Operating temperature:	max. 65 °C (149 °F)
Ambient temperature:	max. 75 °C (167 °F), 30 min
Insertion opening:	min. Ø 52 mm (2.05 inch)
Materials:	PTFE or C-PTFE
Preferred mounting position:	any

- Chemical resistant - ideal for corrosive environments
- Lightweight construction - safer in glass lined vessels
- High rotation speed
- Low working pressure

Version	Part number
1/2" BSP female / C-PTFE	4660-1762-033
1/2" BSP female / PTFE	4660-1765-022

Dimensions (mm / inch)

Rotating cleaners - Clipdisc 100

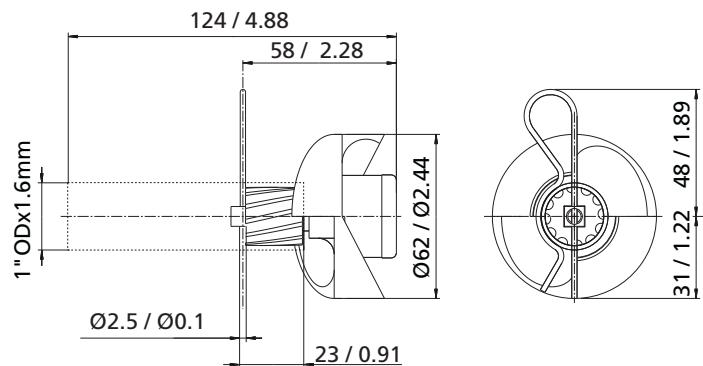

Photo shows cleaner with optional fixing tube

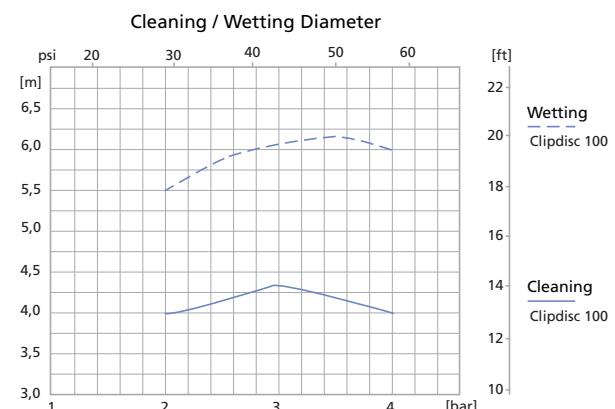

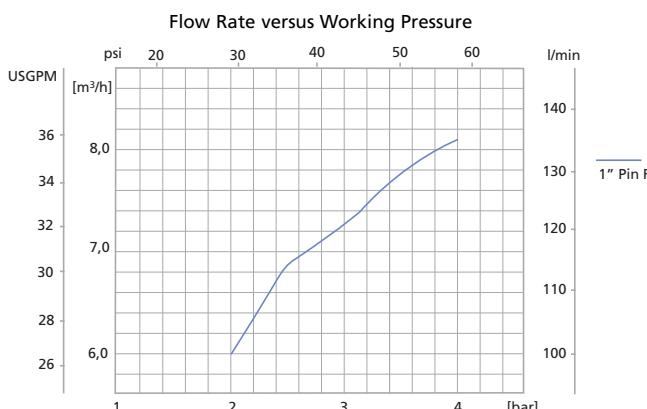

Clipdisc 100	
Working pressure:	2 - 4 bar (29 - 58 psi)
Cleaning diameter:	max. 4.3 m (14.1 ft)
Flow rate:	6 - 8.1 m³/h (100 -135 l/min / 26.4 - 35.7 USgpm)
Spray angle:	360°
Operating temperature:	max. 95 °C (203 °F)
Ambient temperature:	max. 140 °C (284 °F), 30 min
Insertion opening:	min. Ø 80 mm (3.15 inch)
Materials:	stainless steel 316L (1.4404) with PVDF
Preferred mounting position:	any

- High rotation speed
- Ultrahygienic
- Good rinsing performance

Version	Part number
Pin Fix for 1" OD pipe (25.4x1.6 mm)	4660-1301-507

Dimensions (mm / inch)

Rotating cleaners - Clipdisc 150

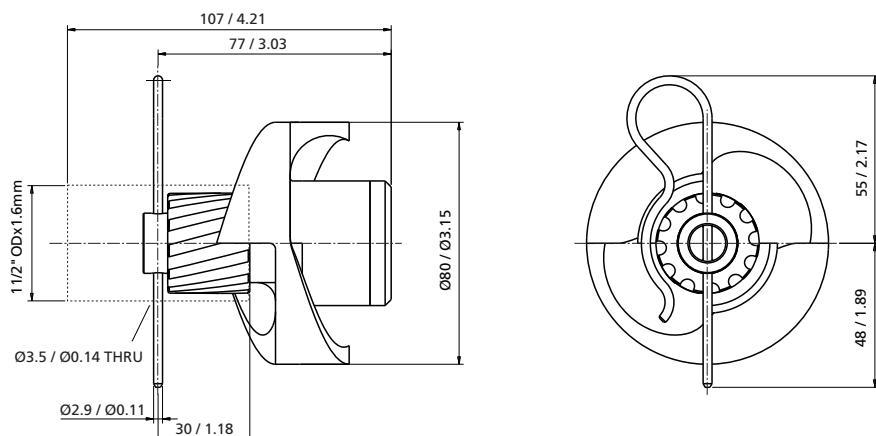

Photo shows cleaner with optional fixing tube

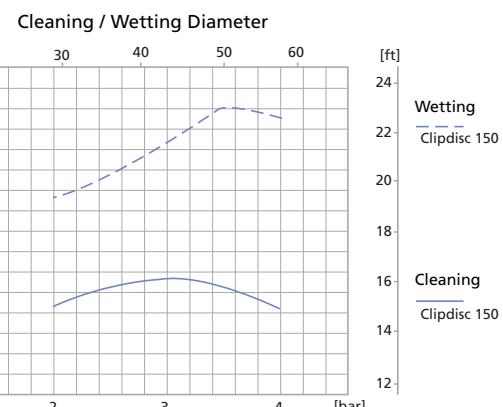

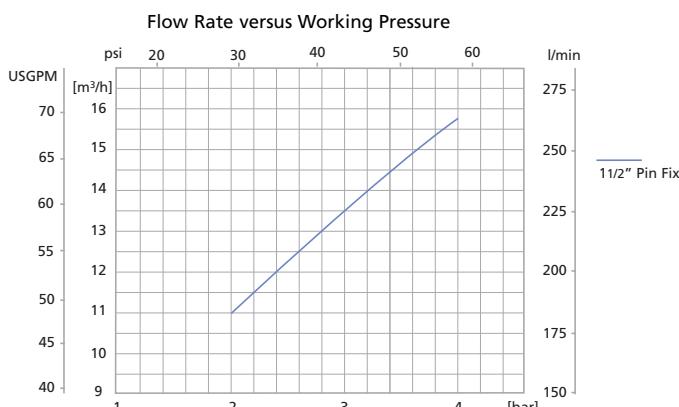

- High rotation speed
- Ultrahygienic
- Good rinsing performance

Clipdisc 150	
Working pressure:	2 - 4 bar (29 - 58 psi)
Cleaning diameter:	max. 4.9 m (16 ft)
Flow rate:	11 - 15.8 m ³ /h (183 - 263 l/min / 48.3 - 69.5 USgpm)
Spray angle:	360°
Operating temperature:	max. 95 °C (203 °F)
Ambient temperature:	max. 140 °C (284 °F), 30 min
Insertion opening:	min. Ø 110 mm (4.33 inch)
Materials:	stainless steel 316L (1.4404) with PVDF
Preferred mounting position:	any

Version	Part number
Pin Fix for 1½" OD pipe (38.1x1.6 mm)	4660-1303-517

Dimensions (mm / inch)

Retractor - In-Line Sprayer, type IS 25

Working pressure:	1.8 - 2.5 bar (26.1 - 36.3 psi)
Flow rate:	2.9 - 5.4 m³/h (48.3 - 90.4 l/min. / 12.8 - 23.8 USpgm)
Cleaning diameter:	max. 1.6 m (5.2 ft)
Spray angle:	192° - 360°
Materials:	product wetted 316L (1.4435) with EPDM / FKM or FFKM not product wetted 316 (1.4301) with NBR
Weight:	approx. 6 kg (13.23 lbs)
Preferred mounting position:	any

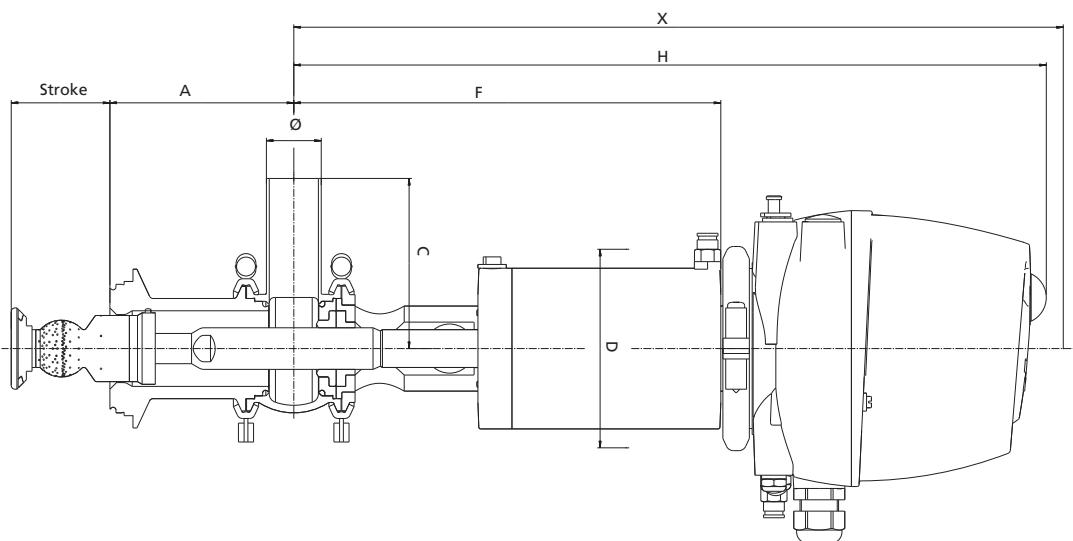

In-Line Sprayer in open position

In-Line Sprayer in closed position

- Spray head is not in the process during production
- Low pressures required
- Huge savings on cleaning agents due to targeted cleaning
- Demonstrable process reliability and functional reliability
- Range of seal materials
- Feedback sensor (optional)

To verify the operation of orbital cleaning devices

Weld-in sleeve system:	GEA
Material:	housing 1.4305
Parts in contact with media:	PEEK
Supply voltage:	18...32 VDC
Non-load power requirement:	< 20 mA
Active output signal:	max. 50 mA (PNP)
Time delay:	< 0.3 s
Response time:	< 75 ms
Ambient temperature:	-10 – + 70 °C
Process temperature:	0...+100 °C
CIP / SIP cleaning:	0...150 °C (max. 30 min.)
IP protection:	IP 65 / 67
Operating pressure:	max. 10 bar (145 psi)

- Aseptic measuring point
- Elastomer-free seal
- FDA/EHEDG compliant

Usage in water and water-based cleaning fluids

Kinematic viscosity	1.004 x 10 m ² /s
Conductivity	0.05 S/m

Type	Part number
Sensor SMW 100 (to monitor the functioning of orbital cleaners)	
With weld-in sleeve	222-000015
Without weld-in sleeve	222-000013

Tempest with
monitoring sensor SMW 100

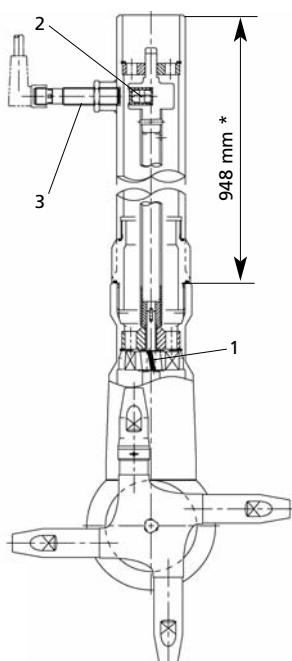

To verify operation of orbital wash heads

Material:	316L (1.4404), C-PTFE, EPDM (other elastomers on request)
Parts in contact with media:	316L (1.4404), C-PTFE, EPDM
Ambient temperature:	magnetic proximity sensor 0 - 100 °C Cleaner max. 140 °C, 30 min
Compatible cleaning devices:	Always supplied as a complete unit with Typhoon, Tempest, Tornado or Tornado 4 (Cleaner has to be specified separately)
Feedback:	magnetic proximity sensor 10-30 V DC
Connection:	Inlet: 1½" or 2" male connection BSP or NPT Outlet: according to Tankwasher Standard Veri-Clean housing supplied without vessel connection (customized vessel connections on request)
Surface:	machine finish inside (generally Ra 0.8 µm to 1.6 µm), Ra 0.8 µm outside mechanically polished up to Ra 0.4 µm outside on request
Preferred mounting position:	vertical

- No extra tank connections
- Includes CIP down pipe
- Variable insertion length

Version

1/2" BSP/948mm	4660-8818-110
1½" NPT/948mm	4660-8818-111
2" BSP/948mm	4660-8818-112
2" NPT/948mm	4660-8818-113

Dimensions (mm)**Operation**

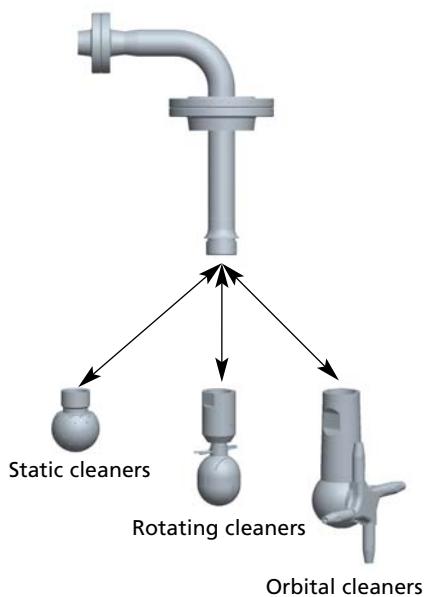

- wash head turbine (1) rotates magnet (2) inside vericlean
- external sensor (3) detects magnetic field
- stream of signal pulses generated during normal operation

* other lengths available on request

Abbreviations and Terms

A/F	Indicates the size of spanners width across flats
approx.	approximately
bar	Unit of measurement of pressure [bar]
	All pressure ratings [bar / psi] are referring to excess pressure [bar g / psi g] if no other data is mentioned.
barg	Unit of measurement excess pressure [bar g]
BS	British Standard
BSP	British Standard Pipe Thread
BSPT	British Standard Pipe Tapered Thread
°C	Unit of measurement of temperature [degree Celsius]
CIP	Cleaning In Place
C-PEEK	Carbon filled Polyether ether ketone
C-PTFE	Carbon filled Polytetrafluoroethylene
CS	Turbo SSB Version CS (combined shaft)
DIN	German standard issued by DIN (Deutsches Institut für Normung e.V, German Institute for Standardization)
DN	DIN nominal width
EN	European Standard
EPDM	Material designation Short designation according to DIN/ISO 1629: Ethylene Propylene Diene Rubber
GEA	GEA AG group of companies GEA stands for Global Engineering Alliance
°F	Unit of measurement of temperature [degree Fahrenheit]
FDA	U.S. Food and Drug Administration
FKM	Material designation, short designation according to DIN/ISO 1629: Fluorine rubber (Viton®)
FFKM	Material designation, short designation according to DIN/ISO 1629 Perfluoroelastomer rubber
h	Unit of measurement of time [hour]
HNBR	Material designation Short designation according to DIN/ISO 1629: Hydrogenated acrylonitrile butadiene rubber
Inch IPS	US pipe dimension Iron Pipe Size
Inch OD	Pipe dimension acc. to British standard (BS), Outside Diameter
IP	Protection class according to IEC 60529
IPS	see inch IPS
ISO	International standard issued by the International Organization for Standardization
kg	Unit of measurement of weight [kilogram]
l	Unit of measurement of volume [litre]
M	metric
max.	maximum
min.	minimum
min	Unit of measurement of time [minute]
m	Unit of measurement of length [metre]
mm	Unit of measurement of length [millimetre]
µm	Unit of measurement of length [micrometre]
NBR	Material designation, short designation according to DIN/ ISO 1629 Acryl nitrile butadine rubber (Nitrile rubber)
NPT	National Pipe Thread
PEEK	Polyether ether ketone
PP	Polypropylene
psi	Unit of measurement of pressure, pound-force per square inch, 1 psi = 6894,75 Pa (All pressure ratings [bar / psi] are referring to excess pressure [bar g / psi g] if no other data is mentioned.)
PTFE	Polytetrafluoroethylene
PVDF	Polyvinylidene fluoride
Ra	Average roughness
s	Unit of measurement of time [second]
T.VIS®	Tuchenhagen Valve Information System
V AC	Volt alternating current
V DC	Volt direct current
VMQ	Slicon rubber
W	Unit of measurement of power [Watt]
